

SAS Math Team Notching Wins

Liz Torrey, Nov 21 2016

St. Andrew's Math Team, led by Math Department Chair Eric Finch, competed in two meets in November. On November 10, SAS was represented by Math Teamsters Evan Chiu '18, Tiger Luo '17, and John Paris '17 in the Eastern Shore Mathematics Competition (seen here) at Salisbury University in Maryland. St. Andrew's won the competition, placing first as a team and first and second place, by Tiger and John respectively, in the individual competition (out of 200 students!).

On November 14, the entire SAS Math Team attended their first Delaware Math League meet of the year at Red Lion Christian Academy, where they placed first as a team in both divisions (9th grade and 10-12th grade), "despite some healthy competition from Appo, Tall Oaks, and MOT Charter," said Coach Finch. Ben Chen '17 and James Doucette '17 placed first in the 10-12th grade individual competition, while Dustin Fang '20 placed first in the 9th grade individual competition. Congrats, Saints Math Team!
